

FARM-BUILDINGS & EQUIPMENT

JAMES DUNCAN

WHETHER you desire to refurnish your old bedroom or to furnish a new one, it is the truest economy to purchase beds and bedding that will ensure a lifetime of restful, health-giving sleep.

Therefore it will pay you to buy an Alaska Bed, a Banner Spring and an Ostermoor Mattress. This sleep-comfort combination is unequalled for real rest and durability,

and is much the least expensive in the long run. It will make bedtime welcome for a lifetime.

The Banner Spring and Ostermoor Mattress are **GUARANTEED** by the largest organization in the British Empire devoted to the manufacture of beds and bedding. You run no risk in purchasing them.

Ask for them by name. Your dealer has them or will secure them for you quickly.

The Alaska Bedding Company Limited

OK FOR THIS TRADE MARK

ITS YOUR GUARANTEE OF QUALITY

A Collection of **HOME AND BARN DESIGNS**

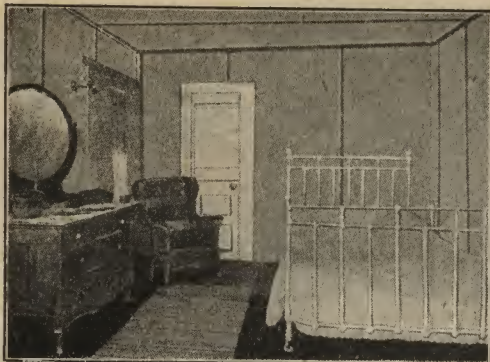

We take great pleasure in presenting this booklet to you for the following reasons:—

- 1—What interests you is of interest to us.
- 2—You want *full value* for your money, both in material and design.
- 3—You want a HOME which is warm, well lighted and well ventilated.
- 4—You want a HOME in which the rooms are well arranged and convenient.
- 5—You want a HOME with an exterior that is attractive and “different.”
- 6—You want a HOME that is *practical* and appropriate for Western climatic conditions.
- 7—You should have a HOME in which only the best forms of Standard Construction are used.
- 8—You want a BARN which is well lighted and will not sweat.
- 9—You want the best HOME and BARN in your community.
- 10—These designs have been prepared with all of the above features embodied. Should your ideas differ from ours, our plan service is at your disposal to work out your own suggestions.

We have the dimensions and cost of each of these designs and can also furnish blue print working drawings and bills of material.

The Firms advertising in this book are reliable concerns, and we will be pleased to furnish all information concerning their products as related to the Houses and Barns shown.

Come in and talk this over with us

- 1—A simple bedroom finished with Empire Wall Board
 2—A charming living-room in Empire Wall Board
 3—A cosy attic den in Empire Wall Board

Artistic in Appearance

Empire Wall Board, when properly erected and panelled, lends itself to the most pleasing and decorative effects by using either soft wall tints or flat wall paints.

Get All the Facts Before You Build

IN new home building or in remodelling old ones, in the city or in the country, in big buildings or little buildings, practical economy demands that you use the greatest care in the choice of materials to be used. The time to investigate is before and not afterwards.

If Wall Board has been decided on for lining the interior walls and ceilings, remember that there is a big difference in Wall Boards. Many kinds are made of paper pulp or shoddy fibrous materials throughout—easily ignited and therefore dangerous. **Shun them.**

You want the best value for your money, dollar for dollar—the most dependable and durable Wall Board that money can buy, *the kind that is Fire Resisting, Weather and Sound Proof, but with-al moderate in cost.* That is:

Empire Wall Board

“THE BEST BY EVERY TEST”

Empire Wall Board is extensively used for the interior lining of Residences, Schools, Churches, Hospitals, Public Buildings, Stores, Hotels, Picture Theatres, Summer Cottages, etc., where “Safety” is the keynote of construction.

No Wall Board sold in Western Canada is so well adapted for Attics and Basements, because the “**EMPIRE**” is the only Board possessing the necessary insulating qualities required in work of this nature.

Empire Wall Board has been largely used for the interior lining of Garages and Chicken Houses, where an inexpensive Board of this kind is adaptable.

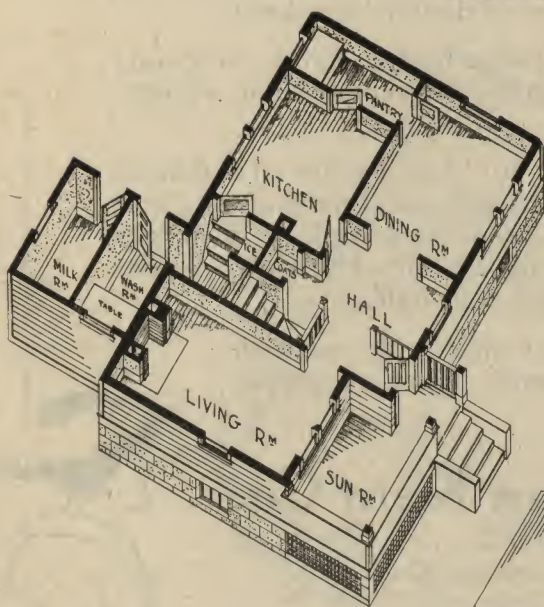

Sold nearly everywhere. If your lumber, building material dealer or hardware merchant doesn't handle Empire Wall Board, write us and we will either tell you where you can buy it or ship you direct.

Lower Your Furnishing Costs Lessen The House Work

MAPLE FLOORS FOR LESS THAN HALF

*You'll never regret having installed Hardwood
Floors in your new home---Buy
them at today's prices*

EVERY housewife will realize what a saving is effected with hardwood floors—no sweeping of carpets or scrubbing of floors—more time for other more essential work about the house, a few minutes spent in a pleasant task—not days of dreaded drudgery.

Hardwood floors will outlast the house itself. Unlike softwood floors, they do not have to be continually repaired and eventually replaced.

Have any lumber dealer estimate for you the cost of softwood flooring. Add to this the cost of carpets and linoleum, to cover which will be more than the softwood floor itself. Then, get our estimate on flooring your new home with maple. You'll find it costs less than half.

No charge is made for supplying you with these convincing proofs. Let us supply you with quotations.

Fresh Running Water

Under Pressure

For Your Farm

What It Means

IN THE HOUSE you have hot and cold water for every purpose. Sinks, laundry tubs, washroom and toilet, etc. No lugging and slopping water. Just turn the tap.

IN THE BARN you have a tap handy for every purpose. No pumps to thaw, trough to chop, or driving of cattle to neighbors to water. You do all your chores indoors. It saves help, money, labor, time and drudgery. Your stock are more thrifty. Your profits begin the day you install it.

What It Is

THE SYSTEM is one designed for just your need—simple, effective and easily operated. It consists of pressure displacement pump, which is located in well, spring or creek—a storage tank which holds compressed air only—an air compressor, and a 1½ H.P. Type “Z” Engine. The Engine is only used for filling the tank with compressed air. The air pipe leads from the air tank to the pump in the well—and the water line leads from the pump to the house, from which you can run as many branch lines as you may desire.

The Canadian Fairbanks-Morse Co. Ltd.

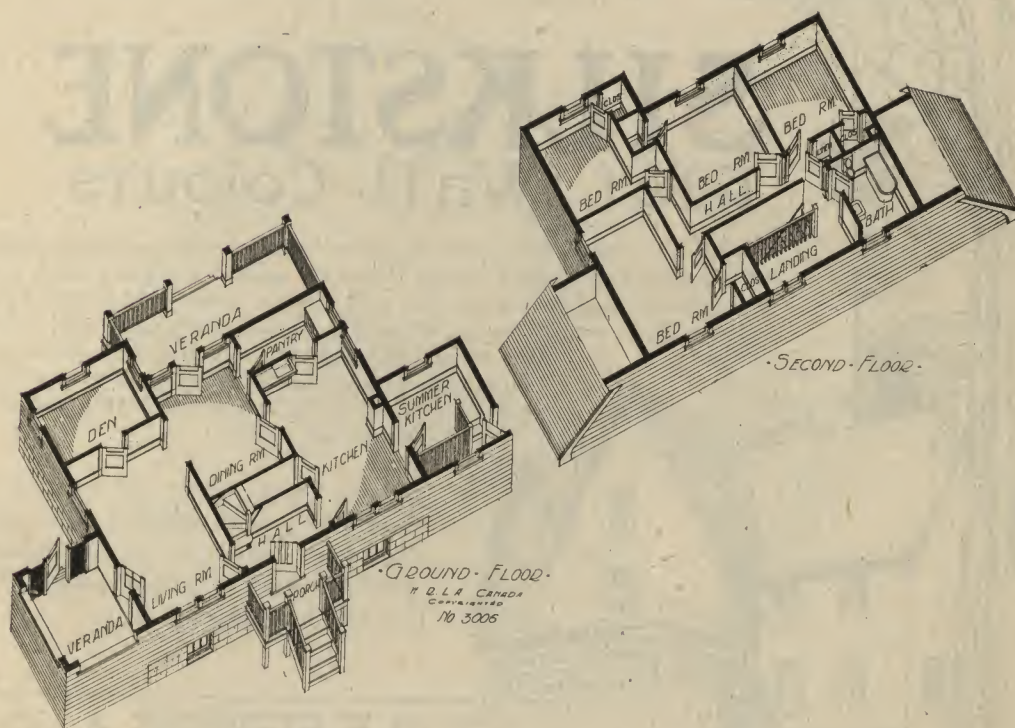

WINNIPEG

SASKATOON

CALGARY

“CALAIS”

- Features:**
- 1.—A successful design for a successful farmer.
 - 2.—The kitchen is as cheerful as any room in the house.
 - 3.—Grade entrance in summer kitchen will appeal to good housekeepers.
 - 4.—Four good bedrooms with closets, linen closet and
 - 5.—bathroom equipped with medicine cabinet on second floor.

Full Information and Working Drawings in connection with the above design will be furnished on application

Doubtless you have spent many hours poring over blue prints and consulting friends—arranging every detail—in order that no mistake may mar the symmetry or beauty of your ideal home.

When you are face to face with the real proposition of construction and decoration you find many difficulties arise which it has been impossible to foresee and guard against.

You are placed in a dilemma, but are determined not to sacrifice quality and appearance for the sake of speed. Why not then be guided by the experience of others who have successfully avoided the pitfalls which confront you by having

SILKSTONE

Flat Wall Colours

take care of the artistic side. Silkstone looks well on any modern wall finish—plaster, fibre board or the ornamental metallic sidings and ceilings—and it is easier to work with and much more satisfactory than wall paper or cheap “cold water” tinting powders. Apart from its beauty, Silkstone is sanitary and long wearing. Soiled spots are easily washed clean with plain soap and water.

When you are house planning add Silkstone to your list of essentials—it is a fitting adjunct to fine lumber, mouldings and sash and doors.

Your paint dealer will be glad to show you colour schemes and quote you prices or our service department will be pleased to submit suggestions and full information.

You can have all the conveniences of the city dwelling---
RUNNING WATER---ELECTRIC LIGHT---SEWAGE DISPOSAL
 Keewanee Systems make them possible anywhere for everyone.

And for comfort
A SAFFORD HOT WATER HEATING SYSTEM
 will give you that necessity of a Western Canadian Home---
A Well-Heated House.

The heart of the Safford System is **The Safford Mogul Hot Water Boiler.**

This boiler contains every feature that many years of practical experience in operation, design and manufacture determined as desirable.

Its construction and finish are mechanically perfect.

Its draft arrangements are most complete. The Mogul Fuel Saver goes with every boiler.

It is the most easily kept clean.

Its grate arrangements for shaking, dumping or renewing are the simplest devised.

Its ratings are most liberal.

It burns either Anthracite or Western Canadian coal.

As for **Safford Radiators** over sixty per cent. of the most important buildings in the country are fitted with them.

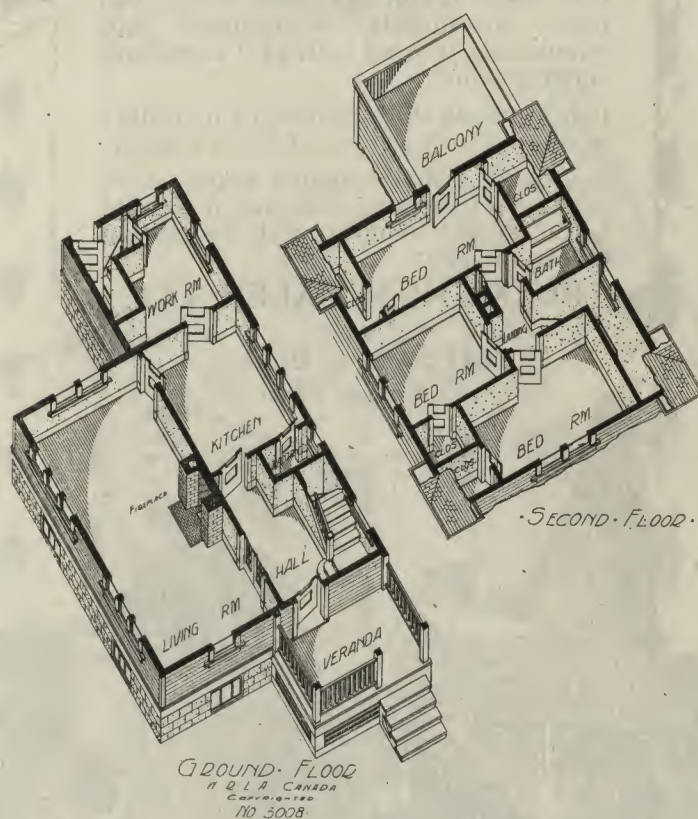

A Safford Hot Water Heating System can be installed in any house, old or new. If you are thinking at all of putting in Hot Water Heating, at least write us, and read what we have to say in reply.

For the houses shown in this catalogue we have full information ready.
 We will also be pleased to send you Kewanee literature.

The Dominion Radiator Company Limited
 58 Victoria Street, Winnipeg. 605 Second St. West, Calgary.
Main Office and Factory: Toronto.

CHARLEROI"

- Features:**
- 1.—An exterior appearance which is a "little different."
 - 2.—Grade entrance at rear appreciated by good housekeepers.
 - 3.—Open fireplace helps to furnish the room and adds comfort.
 - 4.—All the conveniences of a city home.
 - 5.—Bedrooms "under the roof," which means strict economy.

Full Information and Working Drawings in connection with the above design will be furnished on application

Flaxlinum

TRADE MARK REGISTERED

Wind and Frost-Proof Your Farm Buildings

Keep Out Jack Frost

FLAXLINUM put in the side walls and roof of your home will make it deliciously warm in winter and delightfully cool in summer, in fact from 10 to 15 degrees cooler.

INVESTIGATE!

You are bound to be pleased.
30% of your fuel pile will be saved.
It is cheaper to build a warm house than to heat a cold one.

FLAXLINUM is a board form of insulation made from flax fibre which has been thoroughly degummed and chemically treated so that it is rat and vermin proof.

It is equal to 30 thicknesses of building paper or 4 inches of back-plaster.

Ask your lumber dealer about it or just drop us a card and one of our De Luxe sample booklets will be mailed to you at once.

Bishopric Products

are the ideal materials
for any Buildings you
are putting up

They are the modern and less expensive means of building. They appeal especially to the man of modest income, who builds or re-models in a modest way.

The farmer in particular is fast becoming converted to the Bishopric way of better construction because of its convenience, permanence and economy.

BISHOPRIC STUCCO BOARD

IS THE MATERIAL TO USE FOR INTERIORS OF HOMES, as well as foundations for stucco walls. Farmers are also finding out that it pays to use BISHOPRIC STUCCO BOARD for Barns, Stables, Poultry Houses, Grain Bins and Garages. It takes the place of lath, furring strips, building papers and sheathing lumber at a saving of 50 per cent. in time and labor. For stucco work, BISHOPRIC STUCCO BOARD makes a wall that won't crack, warp or shrink—the dove-tailed laths making perfect keys, and the stucco or plaster never falls away.

Permatite Roofing

Waterproof and fire-resisting. Ready to put on. Guaranteed for 5, 10 and 15 years, according to grade.

Bishopric Sheathing

saves 25 per cent. in time and money in building, and makes a first-class job. The name "Bishopric" means quality.

Building Papers

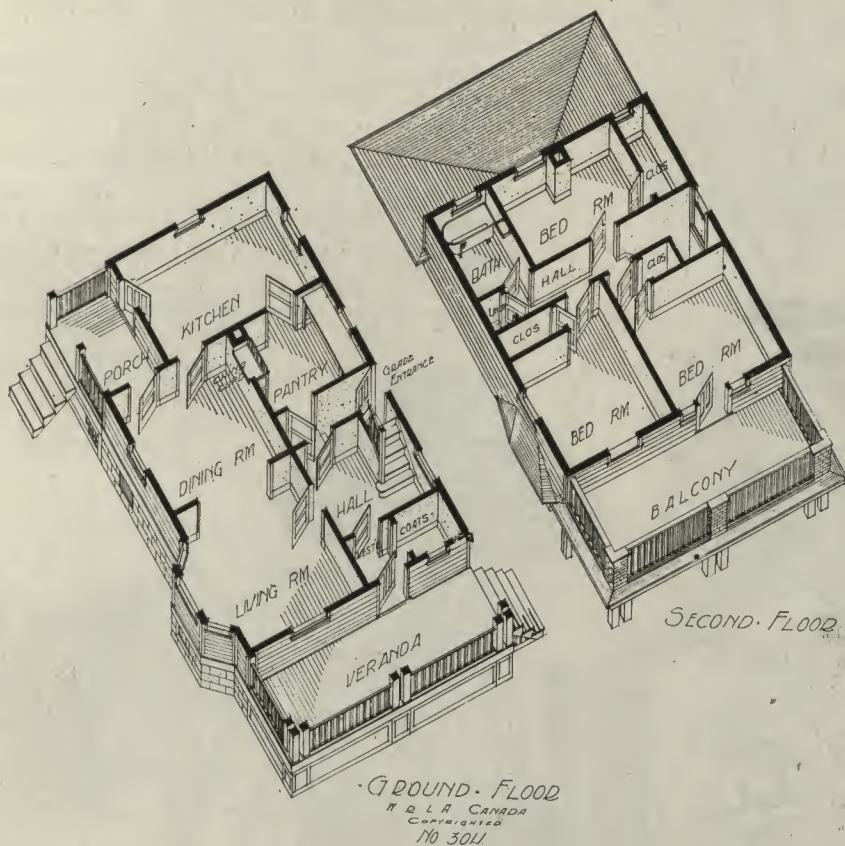

from the Bishopric factory, give every satisfaction because they are made by people who know how.

If you are going to build or re-model house or barn, write us for more information about the BISHOPRIC PRODUCTS and where they may be obtained in your neighborhood, or ask your nearest lumber dealer.

Bishopric Wall Board Co. Limited
OTTAWA, ONT.

SAVE

Your Health, Time, and Money
with an

EDEN WASHER AND WRINGER

Electric or Power Driven

No more need for the hot, hard and unhealthful labor over a hot, steamy wash tub. Let the Eden take care of all the drudgery of wash day.

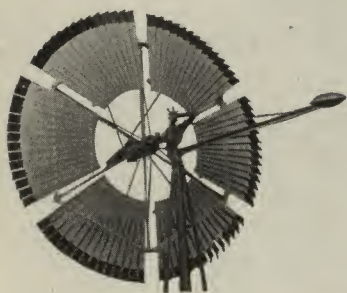

Washing clothes the Eden way costs only a few cents for each family washing, and the clothes are handled so gently that they look better and last about six times longer.

NEW PERFECTION OIL COOK STOVE

Reduce the high cost of living and secure a greater degree of convenience by using the New Perfection Oil Cook Stove (the stove with the long blue chimney).

There is a New Perfection in the correct size for your family. Summer and Winter it cooks more quickly as well as more economically than a coal or wood range and it takes up less than half as much room. It burns Royalite Coal Oil, the ideal fuel.

HOME COMFORT AND ECONOMY

All the Year Round

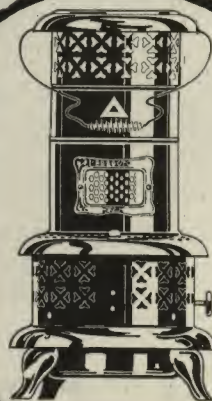

The Perfection Oil Heater gives instant, cheery warmth. It is sturdy, handsome, convenient to care for and easily carried from place to place. It banishes the cold corners and is your comfort assurance if the gas is low or the coal runs out.

It burns Royalite Coal Oil. One gallon will give 10 hours' glowing warmth.

Mr. Farmer or Builder!

Specify British Columbia Coast Lumber and Lath for your New Buildings

B.C. COAST FIR LUMBER is considered the strongest soft wood in the world, is moderately hard, but easy to work. Straight grained, resilient, tough and durable, combining these qualities with great strength, light weight, ease of working and handling, more than any other commercial lumber.

B.C. FIR is *the* ideal wood for farm building purposes. In addition to above qualities, Coast Fir is practically impervious to water, holds nails firmly, takes stain well in any shade or color and combines beauty, utility and durability. This wood is manufactured into every form required for building or general purposes such as:

DIMENSION	STEPPING	CEILING
SHIPLAP	FINISH	SIDING
BOARDS	DOOR & WDW. FRAME STOCK	SILO STOCK
SHELVING	CASING & BASE	WAGON BOX BOTTOMS
LATH	E. & E.G. FLOORING	MOULDING STOCK

B.C. COAST RED CEDAR is exceptionally light, soft and of close straight grain, making it easy to handle and work. It is free from pitch. Its qualities render it free from warping, shrinking or swelling. It is especially suitable for exterior covering for all classes of buildings in the form of bevel siding. It is also used extensively in the following items:

SHIPLAP	LATH	CEILING
BOARDS	FINISH	MOULDINGS, ETC.

FIR LATH

Be sure and specify B.C. FIR LATH for your new home. These are far superior to any substitutes when properly laid.

IN ALL CASES THEY SHOULD BE THOROUGHLY MOISTENED BEFORE USING TO OBTAIN BEST RESULTS.

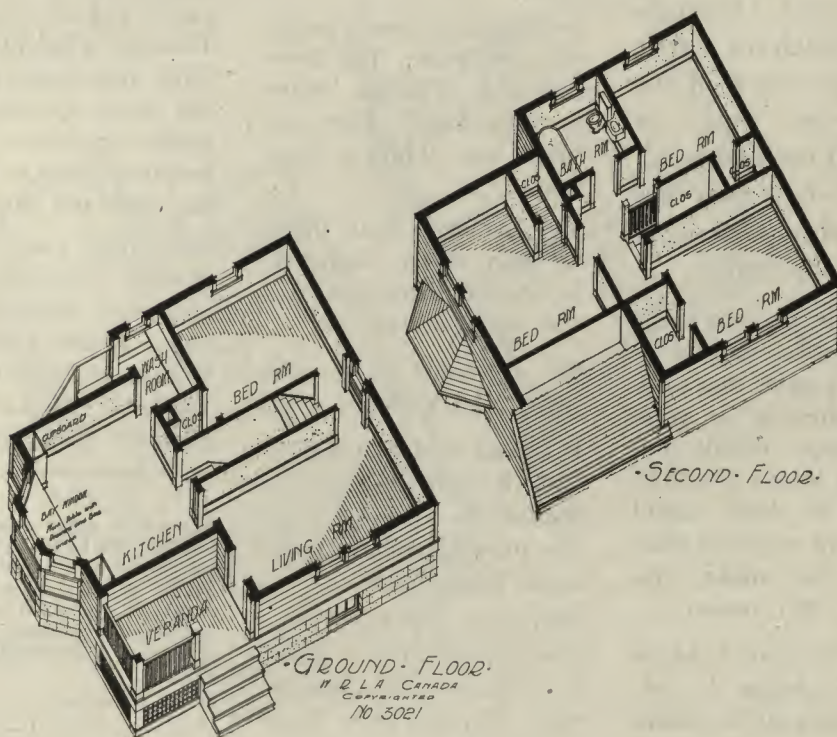

B.C. FIR LATH when moistened will take and hold nails very satisfactorily, and will not swell, shrink or buckle when put in place and positively will not stain the plaster.

*Any further information relative to Coast Lumber or Lath can be obtained
by writing direct to any of the Coast mills.*

B.C. Lumber and Shingle
Manufacturers' Association
VANCOUVER, B.C.

"NOYON"

- Features:**
- 1.—A most suitable design for a prairie setting.
 - 2.—A model kitchen for cheerfulness and convenience.
 - 3.—Note the work table in bay window with cupboards each side.
 - 4.—Large bedrooms and spacious closets.
 - 5.—Stairway well arranged with least loss of space.

Full Information and Working Drawings in connection with the above design will be furnished on application

What are these two talking about?

PERHAPS it's the mare grazing out in front. Perhaps it's the barley field that starts just beyond. Perhaps it's a bunch of cattle that don't show in the picture—or pigs, or sheep. It really doesn't matter what they are talking about—they are enjoying the visit.

And the smoke isn't the least enjoyable part of it, either. It seems that most men in order to be absolutely companionable and hospitable MUST SMOKE. Most of the hard, useful work of the world is done by men who smoke—yes, and *while they smoke*.

A pipe and good tobacco (Orinoco tobacco for instance) keeps up the steam

that runs the world's work. But there are times when a pipe doesn't exactly fit in. Sometimes a *cigar is the thing*.

For instance, when a neighbor rides over. You know how it is. You say, "Have a chair, Joe?" Then *you should say*, "Have a cigar, Joe."

The minute a man lights up he's better company, he likes you better, he likes the world better.

But it should be a good cigar. Don't forget that.

It should be a TUCKETT CIGAR—a Marguerite, for instance, or a Club Special—a smooth-smoking, well-made, honest cigar.

Why don't you buy Tucketts Cigars a box at a time? It is the best and cheapest way. Try this idea. Next

time you're in town buy a quarter's worth of Marguerites or Club Specials. Smoke 'em. See if you don't think they are good cigars—pure-bred. Then buy a box of 25 or 50. Take them home, and after the chores are done—after supper—Sundays—when a neighbor drops in, lay your pipe aside and *smoke a cigar*.

No matter where you are located—you aren't very far away from a barber shop, general store, restaurant, or hotel that sells Tucketts Marguerite and Tucketts Club Special.

*P.S.—

There is a cigar called TUCKETTS PREFERRED PERFECTO. You know about it. Made of the best selected, mellowed, imported leaf. When you want a specially fine cigar, light up a PREFERRED PERFECTO.

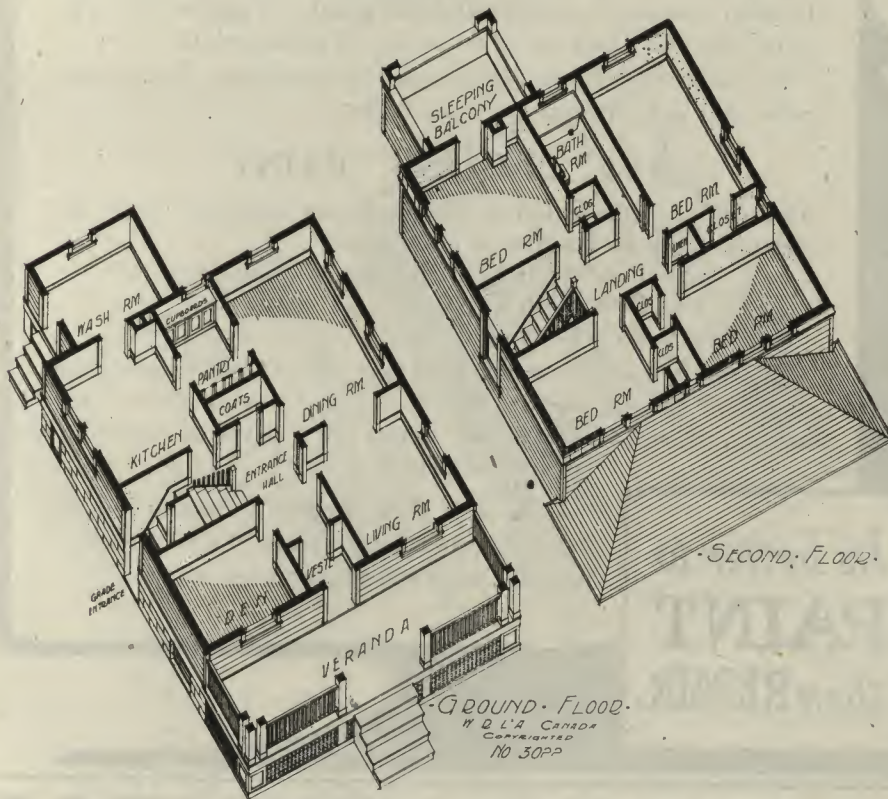

*Perfect Smoke.

SMOKE TUCKETT CIGARS

"Buy them by the Box"

"OSTEND"

- Features:**

 - 3.—Screened sleeping balcony.
 - 4.—Attic if desired.
 - 5.—Ventilation to clothes closets.

Full Information and Working Drawings in connection with the above design will be furnished on application

ECONOMICAL

Because it covers more

Even if this paint were sold at a price half as high again as any other, it would still be the economical paint to use on your house. In sheer covering capacity it has no equal. A gallon of it goes so far that you'll buy less of it and yet do more with it.

For both interior and exterior use, let your brush dip into the paint that goes farthest and lasts longest.

B-H "ENGLISH" PAINT

This paint is guaranteed to possess as its important basis the formula which we inscribe on every can:—

70% Pure White Lead (Brandram's Genuine B.B.)
 30% Pure White Zinc.
 100% Pure Paint.

The result of such a formula is all that you could ask in brilliance of color and in proper "body"—a paint which gives a fine lasting finish, excelling all others in "covering capacity" and in durability.

Paint with B-H "English" Paint and your house is protected for years, where a coat of ordinary paint will last but a few months.

*It's better to
PAINT
 than REPAIR*

Metallic

Fireproof Building Materials

Corrugated Iron

The corrugations are pressed very deep and uniform, insuring the maximum of strength and protection against the severest weather. Supplied with perfect fitting sundries for any size of roof without waste.

Free plans gladly furnished for a splendid type of Implement Shed or Barn. Ask for illustrated booklets. Send sizes of roof or walls for estimate.

"Eastlake" Metallic Shingles

They have been keeping buildings dry inside and proof against fire and lightning for over 33 years. A record to be proud of.

Up to the time this was printed no one had produced the equal of "Eastlake" Metallic Shingles. Over 80 per cent. of all the Western elevators are roofed with them.

They make a handsome roof for any building and can be laid very easily and quickly.

Ask for the "Eastlake" booklet. It tells all about them.

Formed Wood Shingle Valley

Note the butts to stop the rush of water during a heavy rain. That is why it is so much better than the plain flat valley. The best shingles will not prevent a leaky valley if the valley itself is not right. Our Formed Valley for Wood Shingles makes a perfect job and costs no more.

Nearly all hardware and lumber dealers now handle our "Quality First" products. Call on your nearest dealer for full information. If he cannot take your order write us direct stating clearly what you need.

Roll-Top Ridge

For Metal, Wood or Rubber Roofings

It makes a far superior job to the common wood finish and adds greatly to the appearance of a building. Made of good galvanized or painted iron in long lengths. Quickly applied and will outlast any kind of roofing, excepting "Eastlake" Shingles.

"Metallic" Ceilings

The Economical Interior Finish.
"Metallic" never cracks or falls off—never needs repairs and lasts as long as the building. This cannot be said of any other material. Why not finish your ceilings and walls with our beautiful "Metallic" designs and be through for all time with the muss and fuss of plastering and papering. Illustrated booklet "C" shows a fine choice of designs. Write for a copy and send sizes of ceilings or walls for a quotation.

We manufacture the famous "Halitus" Ventilator—a low-priced barn ventilator designed to give perfect ventilation in any kind of weather. Also tight fitting Eavetrough, Conductor Pipe and all the sundries.

Westwo

REGD

GUARANTEED LINE

*No. 400--Westwo Four-Horse, Gang, Sulky or
Disc Plow Evener*

Easily attached to right or left hand plows. Works four horses abreast, one in furrow and three on land. Evener works freely and equally on all horses. Has no side draft and gives each horse plenty of room. Can be used on any plow having a cross clevis hitch or on disc plow with flat draft bar. For plows with frame or vertical clevis hitch use our clevis attachment No. 10. Is painted red, striped and varnished and carries Westwo guarantee.

The above cut is one of the many two, three, four, five and six-horse Wagon, Plow and Implement Hitches we manufacture for the Farmer.

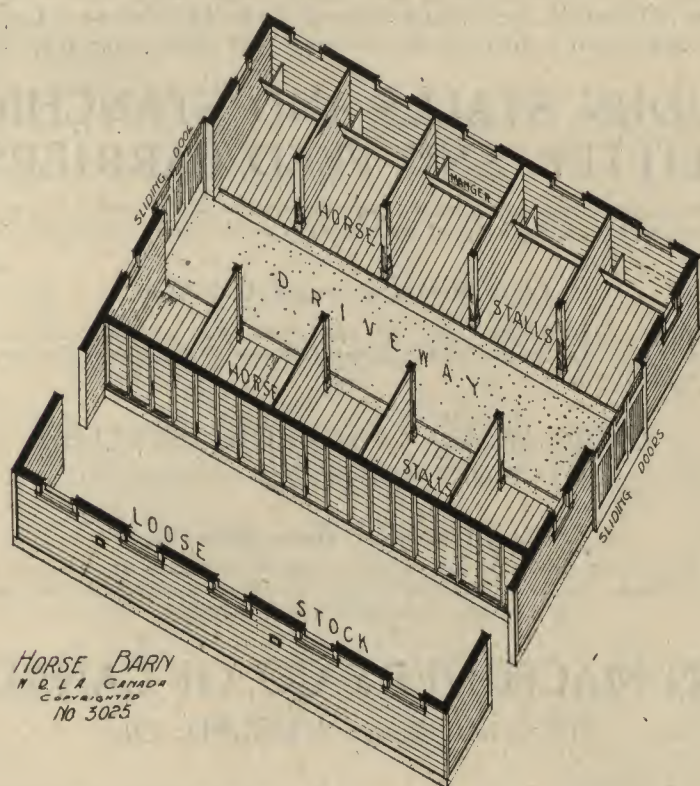

*We also manufacture Wagon Parts, Farm Sleighs, Cutter Gears and Boss Harrows.
Send for Illustrated Folder.*

 - 2.—with stalls for 12 cattle in lean-to if desired.
 - 3.—Light and ventilation obtained by windows over lean-to roof
 - 4.—for inside horse stalls.
 - 5.—Concrete floor all over with plank floor to stalls.

Full Information and Working Drawings in connection with the above design will be furnished on application

WE MAKE EVERYTHING FOR THE BARN

LOUDEN BARN EQUIPMENT

Is designed to meet just such labor conditions as now confront the farmer and dairyman. It does for the barn what the tractor does for the field—releases man-power—makes it possible for one man to do the work of several—solves the problem of scarcity of farm hands.

Barn cleaning, stock feeding and a great many other tasks which must be performed daily in the care of livestock are actually reduced one-half by the use of Louden Equipment. Moreover, the equipment is there to do the work year after year—it is *permanent*.

LOUDEN STALLS AND STANCHIONS LITTER AND FEED CARRIERS

and other equipment possess advantages in simplicity, strength, convenience, comfort and safety for the livestock found in no other equipment. Easily installed, fits any size or style of barn—new or old—costs less than wood, outlasts the barn.

Our New Illustrated Catalogue

SENT POSTPAID—NO CHARGE—Shows the full Louden line, including Stalls and Stanchions, Feed and Litter Carriers, Animal Pens, Horse Stable Equipment, Barn and Garage Door Hangers, Hay Tools, Water Bowls—"Everything for the Barn."

OVER-HEAD CARRYING SYSTEMS

FOR FACTORIES, WAREHOUSES, GARAGES, ETC.

Also get Louden Barn Plan Book

One of the most valuable books on barn building ever written—not a catalogue, but a 112-page encyclopedia of dollar-saving information—no charge—a post card brings it to you.

*Barns with concrete foundations,
Concrete floors, Concrete mangers
and Concrete barn approach—at the
Experimental Farm, Indian Head.*

Build Your Foundations of Concrete

**and you will have made a satisfactory
beginning for any type of structure**

Build your barn floors of concrete, and you will have made sanitary conditions in your cow barn and horse stables, with labor of cleaning reduced to a minimum.

By using concrete when making improvements, you can gradually build up a new and better type of structure, for you build but once when you build of concrete.

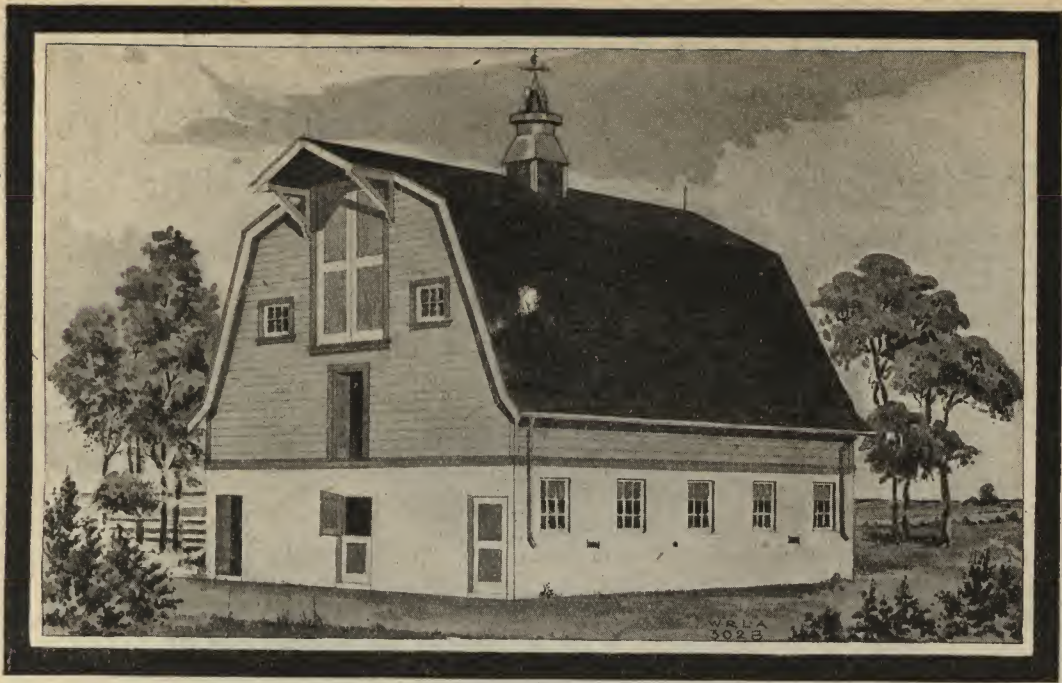

Concrete structures are permanent, ratproof, fireproof and waterproof.

If you contemplate building anything of concrete, get our book "What the Farmer Can Do With Concrete," it tells in plain simple terms, with illustrations and plans to make the explanation clearer, how to build all the things on your farm that should be of concrete, and how to build them right. This book is free to anyone who writes for it.

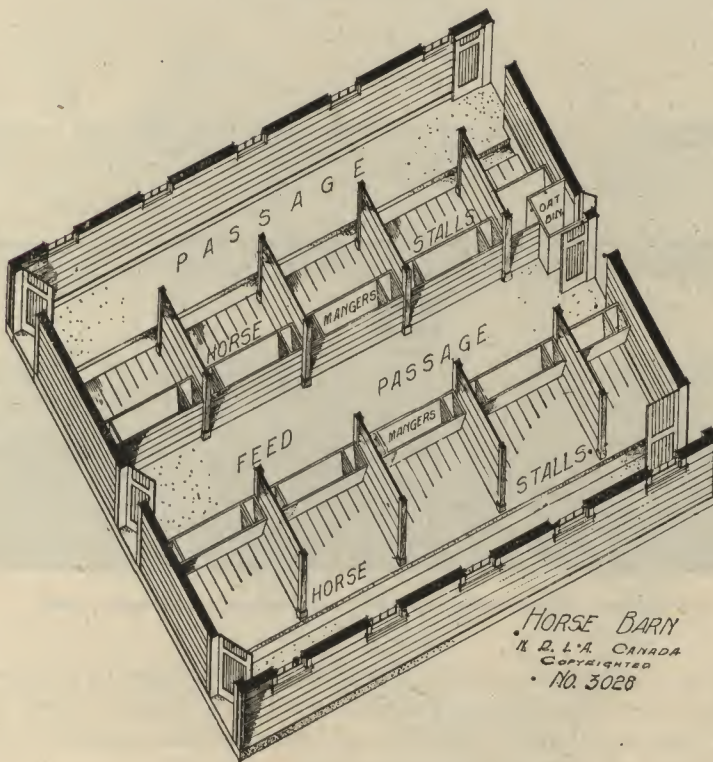

Canada Cement can likely be secured through your local lumber dealer; if you have any difficulty in locating it write our nearest sales office.

Canada Cement Company Limited
Herald Building, Montreal

Sales Offices at Montreal, Toronto, Winnipeg, Calgary

“SOMME”

- Features:**
- 1.—The much admired centre feed passage idea.
 - 2.—Well braced roof with unobstructed loft space.
 - 3.—Good light and ventilating system insuring good health.
 - 4.—Outside frame walls securely anchored to concrete wall.
 - 5.—Well arranged feed bin at end of passage.

Full Information and Working Drawings in connection with the above design will be furnished on application

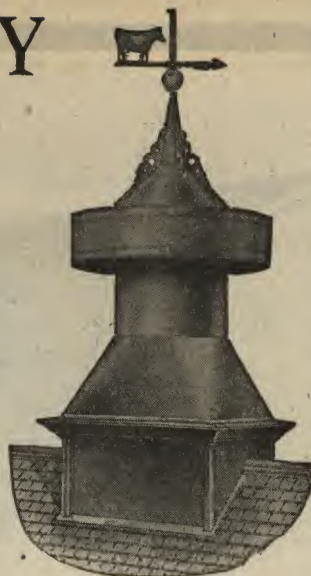

TOWNSLEY

of

VENTILATION

Our system is recognized throughout America as THE STANDARD in ventilation as well as in lightning protection. Ventilators are made of heavy gauge galvanized iron, strong, durable and most artistic. Shipped ready to place on building—one hour sets them in position.

The TOWNSLEY consists of three parts—the VENTILATOR, FOUL AIR FLUES and FRESH AIR INTAKES. Each TOWNSLEY system is specially designed for the building for which it is intended and is built according to the measurements of the building.

SYSTEMS

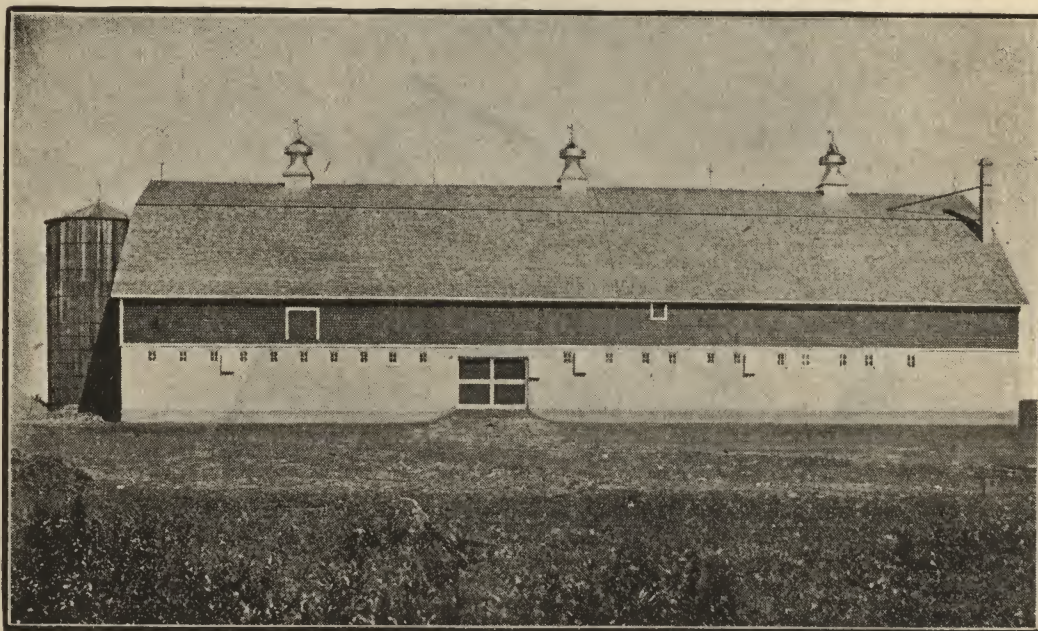

LIGHTNING PROTECTION

Not only is the TOWNSLEY system of lightning protection the most infallible guarantee against lightning known to science today, but the man whose buildings have been rodded by this system will SAVE MONEY IN REDUCTION OF HIS INSURANCE RATES that will quickly pay cost of installation.

MADE IN CANADA

It pays to patronize Home Industries when materials are always guaranteed.

They have proved the most effective means ever introduced into Western Canada for the safeguarding of valuable livestock and buildings from the vicious effects of foul air and the destruction of electric storms.

Barn of Andrew Wishart, Portage la Prairie, Man., equipped with Townsley System

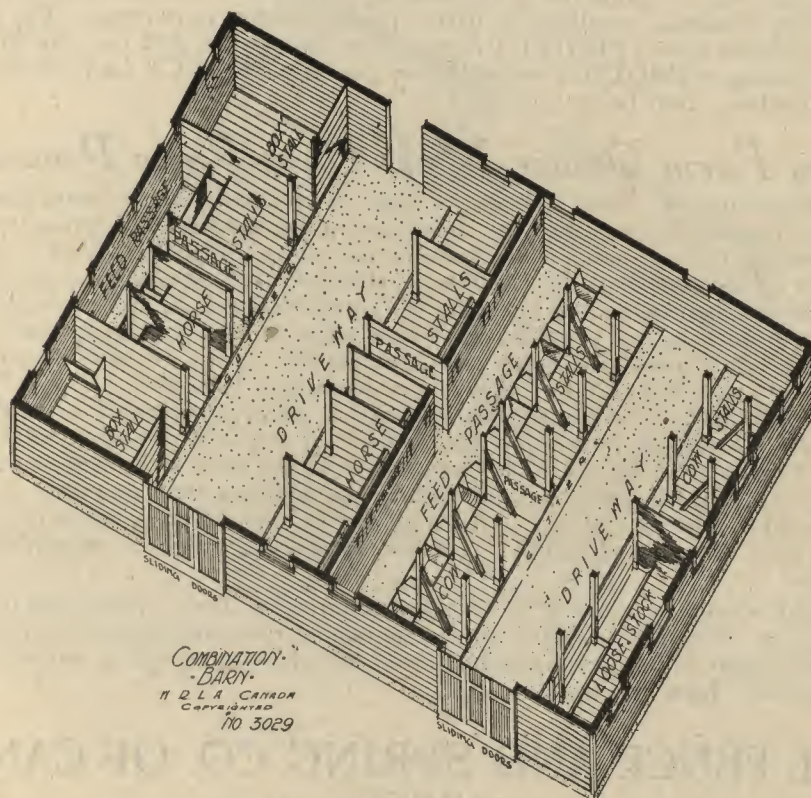

If you will send us the roughest sketch of your barn interior, giving dimensions, we will send you—without any obligation on your part—complete plan in detail of our system adapted to your barn with cost of same. It will pay you to an extent of which you have no conception if you will give this your immediate attention.

Canadian Lightning Arrester & Electrical Co. Ltd.
Brandon, Manitoba

DEPT. B.

“VERDUN”

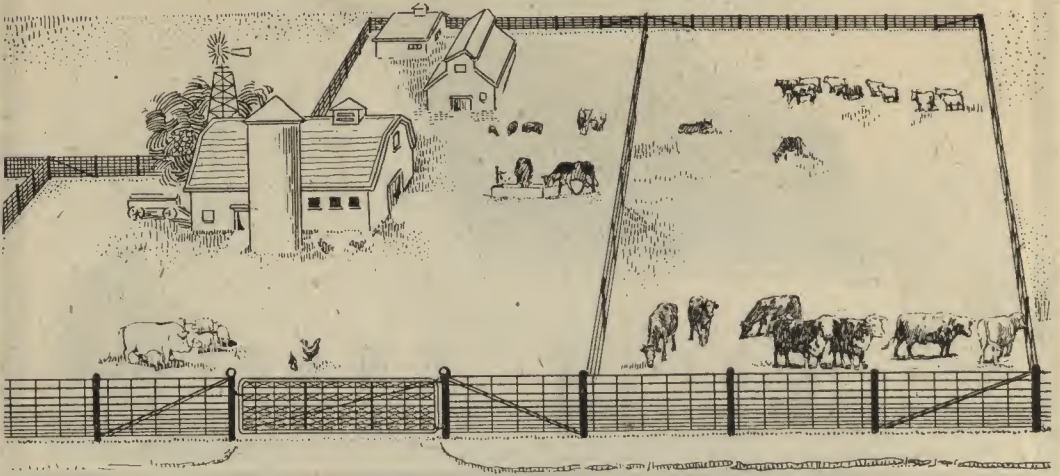

- Features:
- 1.—Two barns under one roof.
 - 2.—Good arrangement of feed passages.
 - 3.—Accommodation for 15 horses, 18 cows and loose stock.
 - 4.—One ply of lumber outside and two ply on inside of walls with tar paper
 - 5.—prevents “sweating” and dampness.

Full Information and Working Drawings in connection with the above design
will be furnished on application

"IDEAL" FENCE

For Your Farm

"Ideal" Woven Wire Fence

has many advantages over barb wire. In barb wire only *Soft* wire of *No. 12 gauge* is used, whereas "Ideal" Fence is made throughout of *Hard Steel* wire, and in the heavy styles only the large full *gauge No. 9* wire is used, giving you a stronger fence, a fence with greater lasting qualities, resulting in better protection for your crops. The merchant insures his merchandise to PROTECT himself from loss by fire, and you, the farm-owner, must erect fencing to PROTECT yourself from loss—to PROTECT your growing crops—your merchandise—from being destroyed.

Every Farm Owner Must Have Fence Protection

In the manufacture of "Ideal" Fence we have provided for every contingency. The horizontal or line wires have a wave or crimp which gives elasticity and spring to the fence, and also provides for contraction and expansion caused by the heat and cold, a very necessary feature for fencing erected in the Western Provinces where you have severe winters. The uprights or stays are made in one piece, giving stiffness and rigidity to the whole panel of the fence, making it hard to crowd down from above or root up from beneath, and also allows you to place your fence posts farther apart than when barb wire is used or when a soft wire is used. The "Ideal" Lock is a distinctive feature of "Ideal" Fence. It grips the horizontals and upright wires in five different places, absolutely preventing slipping of either wire. From top to bottom "Ideal" Fence is the same—the line wires, the stay wires and the "Ideal" Lock are all full gauge No. 9 hard steel wire, with every wire full of strength and properly galvanized to protect and preserve that strength. Strength is what you want in a fence. In buying fencing, buy the best. Don't experiment. "Ideal" will please you, will give you THAT protection you have a right to expect of the best fence made.

The "Ideal" catalogue showing many different styles of "Ideal" Fence will be sent you free on request. You will find it to your advantage to take your fencing troubles to your local lumber dealer or hardware merchant who will gladly give you an estimate of your requirements of "Ideal" Fence.

Here is the Champion of
All Fanning Mills

THE "KLINE"

The little wonder that works at a capacity of 100 bushels an hour. For all kinds of grain the *Kline* is the peer of any Fanning Mill ever made.

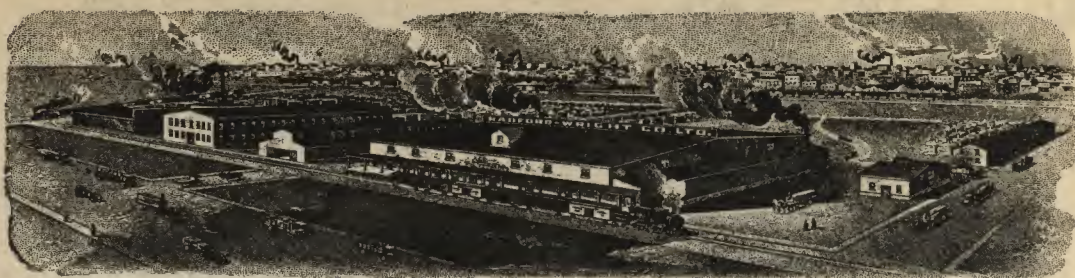

The KLINE is the *only* Fanning Mill made that *weighs* as well as grades the grain. The farmer using the Kline has by far the strongest and most durable, the easiest running and the fastest cleaning mill on the market. The Kline is the incomparable separator of wild oats.

The Kline sold at auction *second-hand* at a higher price than the cost of an ordinary new machine, because the farmer knew its sterling worth. The Kline on your farm would mean that you would get every possible dollar for your crop, whilst an *inferior* Fanning Mill will lose you money right along. You can't afford to be without the Kline. Don't buy until you have seen this Fanning Mill. It will mean dollars and cents to *you* to get particulars about the Kline from *us*. *Write to-day.*
